CIRCULAR.

Teachers, and others interested in the cause of popular education in the State of Vermont is called to Section 2, Act No. 2, of the Lave of

Section 2.—The Board of Education are berely authorized, and it is made their laty, on the later of the part of the fore said that every fifth year thereafter, to select a list of such grammars, geographics, arithmetics, his terms of this State and the United States, plaining the property of the day. The School Wine Bitters, an elegant preparation. Also, cores of this State and the Linted States, publication, algebras, readers and spellers, not according one book of a kind in each branch, as they shall deem best suited for instruction and up in the district schools in this State, in each as said branches; and shall cause the list so selected to be published in all the news apers published in the State, during the meints of January next following the making of such selection; and also to be inserted in each school register issued after one year from the making lection; and a so to be inserted in each schoolegister issued after one year from the makin of such selection; which list, so schered, shall be and remain authoritative and inding upon the Board or Education, superintendents and teachers, and during five years from and after November 1, 1868, and each live years thereafter; and superintendents and teachers shall recommend for use in the district schools, as new books shall become necessary for instruction in the branches named, no other than the books included in said list so selected and published.

The following is an extract from the Report of the Board of Education, for the year 1867,

page 8 : Mitchell's First Lessons, Primary, and Inter-mediate Geographics were adopted, for these reasons, in brief; the suspicity and clearness of the text, the gradual and constant advance-ment from the primary truths to the higher departments of geographical knowledge, the con-ciseness and completeness of the definitions. the elegance and accuracy of the maps, the at-tractiveness of the patiental illustrations, and the uniform method of freating topics that ar-similar to each other. Since the adoption of these books, the publishers have taken meas-ures to prepare a spec a edition of the Intern-diate Geography for use in the schools of Ver-This edition will contain a new quarte map of the State, engraved on copperpiate map of the State, engraved on exploribate; and four pages of letter press and questions, reasting to the geography of Vormoni to be prepared by key. Piny H. White, it is believed that this feature, while it is not to increase the cost of the books, will nate raily increase its value and the interest with which it will be studied McNaily's Physical teography, accompanied by Monteith's Lessons in Astronomy, was adopted, to be used in those departments of the study which are indicated by their titles. Guyot's Common School Geography was adopted as a Physical Geography of a grade different from McNaily's.

Inasmuch as there seems to be some misapprehension as to the intention and design of the Board in recommending the different text-book in geography, it seems proper to state that i was their intention to recommend the use of Mitchell's Geographica by all classes which have hitherto used, or which would otherwise use Cornell's, and that they did not design that Guyot's Geographies should be used, except by pupils who, having passed through Mitcheli's. desire to advance to the study of physical geography by Guyot's method.

The publishers of Mitchell's New Geographies will send agents into every town in the State, to supply schools according to the terms annexed. and it is hoped that superintendents will furnish every facility for the speedy prosecution of their business.

L. F. WARD, A. J. SANBORN, M. CLARKE, JOHN B. PAGE PLINY II. WHITE, JONATHAN ROSS, D. D. GORBAM, State Board of Education. A. E. RANKIN,

GREAT IMPROVEMENT IN DENTIS-TRY. The attention of the public is called to a great liscovery in Dentistry.

HE GREATEST ADVANCE STEP EVER MADE IN THE ART.
The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough and d to this the annoyance of food getting wider the plate while cating. I have discovered a method of so constructing the plate of shigh the treth are set that they will not start or drop while eating or speaking, neither will any particles of food get under the plate, in matter what the condition of the mouth is, chick is not true of any method hithertoused.

The is not true of any method hithertoused.

I have secured Latters Patent for the United States, England and France.

The improvement s not in material, but in the construction, whichs centres the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement to Dr. L. Gilman, to wit, the Counties of Frankin, Washington, Chattenden, Lamoulle and Grand Isle. Those wishing to avail themselves of such improvement, will call on

of such improvement, will call on
